## Projects

### My Portfolio Website

Developed a personal portfolio website using HTML, CSS, and JavaScript to showcase my skills, projects, and accomplishments. The website features a responsive design, ensuring compatibility across devices. Integrated with GitHub and LinkedIn, the portfolio highlights my expertise in web development and provides a platform for potential employers to connect with me.

### Spotify Clone – Music Streaming Web Application

Developed a Spotify Clone using HTML, CSS, and JavaScript, replicating the core functionalities of the popular music streaming platform. The application features an intuitive UI, seamless music playback, dynamic playlists, and a responsive design for a smooth user experience across devices. Implemented JavaScript for interactive elements like play/pause controls, volume adjustment, and song queue management. This project demonstrates strong front-end development skills and an understanding of user-centric design principles.
